Contacts to Thai Scientists

Dear Mr. Andrade:

This is to inform you that I have attended the 2nd Princess Chulabhorn Science Congress "Environment, Science and Technology" in Bangkok from 02 to 06 Nov.92. We presented a poster (abstract sent to you on 18 Jul.92) entitled: "Standardization of Enzyme Activities for the Metabolic Promutagen Activation in in Vitro Mutagenicity Assays,
R. Draper, F. Tewes, H.-J. Haussmann, R.-A. Walk,
INBIFO Institut für biologische Forschung,
D-5000 Köln 90, FRG".

The congress was scientifically stimulating and an excellent forum to develop new relationships with Thai scientists, which could be helpful in the future. I have focussed on local Thai scientists (e.g., institute heads at the Kasetsart University, Bangkok) being involved in research and administration of food ingredients.

In addition, my contacts to the Chulabhorn Research Institute have been significantly strengthened, since the Princess and her staff plan to build a new animal laboratory for toxicological research including inhalation toxicology. Because of the significant lack of local expertise I have been invited to contribute to this project as a consultant. In this context, I am interacting not only with the key-staff of the Chulabhorn Research Institute including the Princess but also with high-ranked ministry officials being involved in the building project. I think that this support of their project will open many doors for us.
